Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/856,228	Applicant(s) LINDEN, CRAIG L.	
	Examiner JAMILA WILLIAMS	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Prosecution Application

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/4/2008(RCE) and 10/24/2008 (claims correcting non-compliance) has been entered.

Claim Objections

2. Claims 6,11,13,17,19 and 21-25 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3725

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by 6,744,370 to Sleichter, III et al (hereinafter Sleichter). Sleichter discloses a tactile interactive system without a host pc comprising an energy source (column 2 lines 51-61), transducing means for input and output (abstract), means for operatively connecting the energy source and transducing means (controller). In that the structures are met by Sleichter, it is presumed to be inherently capable of the claimed functions.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kikinis in view of 5,984,880 to Lander et al (hereinafter Lander).

Kikinis discloses a powered interactive display comprising an energy source means (power supply 33), a transducing means (column 5, lines 56-67 of the specification) for input and output, physical display means (doll 13), an a local or remote control means

Art Unit: 3725

(fig 2), means to deliver electrical energy to a being (fig 2), further comprising a means for connecting energy source and transducing means (PC 15), a recording and playback means (column 8, lines 52-57 of the specification). Kikinis also discloses an additional or hybrid display means (column 3, lines 66-67 and column 4 lines 1-4 of the specification).

Kikinis does not however disclose the apparatus is operable without a pc host computer.

Lander teaches having an interactive physical display that has tactile feedback. Lander further teaches having a wireless communication system without the use of a host computer (column 15 lines 1-10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the teachings of Lander with the system of Kikinis for the purpose of making the system wireless.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and was not used to reject any claims in this office action.
